Dear Dominique and Elizabeth,

I want to extend my sincerest thanks to you for your contributions in making The McDonald's Division Wesley Barrow Stadium community service day a huge success. From the inception of this project it was obvious that we needed professionals who understood not only how to execute community service projects but to understand the challenges of working with city governments and those people and organizations that support them.

Early on I knew you and Elizabeth would be the perfect team to assist us. You know The Coca-Cola Company but could also provide the practical experience on how best to execute these types of community service activities. Your expertise saved the day.

After seeing you action, our entire McDonald's project team recognize all the time, energy, passion and value you and Elizabeth brought to bear on creating this very special community service day. I imagine that this will be a favorite memory for so many people; in my opinion, it certainly was the highlight of the week.

Moreover, I hope the city of New Orleans, NORD and the people of the seventh ward will use Wesley Barrow Stadium as a beacon to light the way for other companies to help renew and refresh this impoverished city. To know that kids will be enjoying themselves on this restored baseball field gives me a feeling of great joy and accomplishment.

I appreciate all you did on our behalf to overcome the many difficult obstacles to make this happen the right way. You should be proud of your great work. Thanks again to you both for executing such a rewarding and successful project.

Most Sincerely,

  
David Quillin
